

Student Details

- **Full Name**: Aliyu Lawal
- **Student ID**: 301839818
- **Matric No**: 2025/B/CYB/0754
- **Department**: Cybersecurity
- **Institution**: MIVA Open University
- **Email**: a.lawal9818@miva.edu.ng
- **Phone**: 2348162675810

Project Overview

This project is a fully functional, multi-page, responsive website designed to serve as a personal academic portfolio and student management platform. The website showcases my profile, skills, academic achievements, projects, and includes an interactive academic task planner. Also, the project demonstrates proficiency in **HTML5, CSS3, and JavaScript** while adhering to modern web design principles.

Live Demo

GitHub Pages Link: ``https://yourusername.github.io/aliweb3-portfolio/``

GitHub Repository

``https://github.com/yourusername/aliweb3-portfolio``

Functional Requirements Implemented

1. **Homepage**: Student name, welcome message "Welcome to Aliweb3", navigation menu, brief biography.
2. **About Me Page**: Educational background, career aspirations, technical skills list, hobbies and interests.
3. **Projects Page**: 3 sample projects
4. **Academic Planner Page**: Interactive task manager. Features: Add task, Mark as completed, Delete task. Data saved to ``localStorage``.
5. **Contact Page**: Form with Name, Email, Phone, Message. Full JavaScript validation for empty fields, email format, and phone digits only.

Technical Requirements Implemented

HTML

- Semantic elements: ``header`, `nav`, `main`, `section`, `article`, `footer``
- Forms, Tables, Images, Hyperlinks, Lists, Multimedia: ``video`` tag

CSS

- External stylesheet: ``css/style.css``
- Responsive design with Media Queries
- Layout: Flexbox for navbar, CSS Grid for projects
- Navigation styling with hover effects
- Animations and Transitions
- Consistent color scheme: Navy Blue ``#1e3a8a`` and Gold ``#facc15``
- Mobile-first, mobile-friendly interface

JavaScript

- Event Handling: ``onclick`, `onsubmit`, `addEventListener``
- DOM Manipulation: Dynamic task list rendering
- Form Validation for contact form
- Dynamic Content Updates: CGPA and Task counter
- Arrays and Functions: Task array management
- Interactive Task Management System with ``localStorage``

How to Run Locally

1. Clone the repository

```
``bash
```

```
git clone https://github.com/yourusername/aliweb3-portfolio.git
```

2. Open ``index.html`` in any modern browser.

Tools Used

HTML5, CSS3, Vanilla JavaScript, Git, GitHub Pages

ABSTRACT

This project presents the design and development of "Aliweb3", a responsive student portfolio and academic management website. The platform serves to showcase the academic profile, skills,

projects, and achievements of a university student. It also includes an interactive academic planner to help manage tasks. The website was developed using HTML5 for structure, CSS3 for styling and responsiveness, and JavaScript for interactivity and form validation. Key features include a 5-page navigation system, responsive grid and flexbox layouts, a dynamic task planner with CRUD operations, and client-side form validation. The project meets all the requirements for COS 106 and demonstrates the application of web technologies in solving academic management needs.
